Ask anything about the data!

```
user_question = "What is the count of all transactions with amounts over $10?"
```

```
☑ Agent Final Answer

Agent: SPARQL Query Translator and Executor

Final Answer:
There are 2 transactions with amounts over $10.
```

But why not use ChatGPT?

- FinanceFlow makes **far** fewer mistakes

- You can tailor **everything** to your needs with FinanceFlow

- Scales **extremely** well
